

## Cam &amp; Groove Fittings

## Strap-Grip Saddles and Fittings

Strap-Grip is designed to provide greater resistance to end pull than conventional band clamps alone. Only the fittings shown below are designed for use with Strap-Grip Saddles. Saddles are designed for use with 3/4" or 5/8" wide bands. Band clamps should first be applied to the O.D. to seal the hose. Then Strap-Grip saddles should be banded over the initial clamp to anchor the fitting in the hose. Bands must be purchased separately.

## saddles only
